**QA suggestions:**

Any modifications/additions/deletions to be made to the code. It also includes any flaws/mistakes that need to be corrected in the code

1. In line 23, The description is given for m\_1 whereas se\_bo is a table with input (1, m\_2) 2. Since only 1 boresight input needs to be passed, consider renaming the input parameter as se\_bo creates confusion as it is also referring to the 15x4 table of all boresights. 3.

**Implementation:**

The changes implemented as suggested by the review points will be documented *Eg*: 1. All changes are implemented

**Post-QA Permanent Links:**
